What does your company do and what services do you offer?

TACO CANADA LTD. is a manufacturer/supplier of “green” liquid heating and cooling (hydronic) products, systems and solutions for the residential and commercial (municipal, Industrial, educational, retail, manufacturing and healthcare) sector buildings.

TACO also manufactures/supplies a high value low cost building control system – iWorX, for the residential and commercial markets where service contracts are not desired by the end user

How many people do you employ and what is the scope of your operation?

TACO Canada directly employs 15 people at the Milton facility with a downstream headcount of 50 across Canada via Reps, Agents and Wholesalers.

At Milton, we engineer, assemble, stock, expedite, sell and repair our TACO and peripheral products.

Are there any highlights or major initiatives your company would like to publicize?

Absolutely, our control system, iWorX is suited for local businesses, municipal buildings and “big” houses. This system will provide ease of control and communication with the systems that heat, cool, and protect these buildings. There is an immediate energy benefit, but even better, once the system is

installed (which is non complex), there are no monthly/annual costs to keep the system running.

What is your building size in square feet?

30,000
